EXAGATE

SMARTPACK CENTRAL
MANAGEMENT SOFTWARE

SmartPack monitors, manages, and reports your environmental and energy data in locations such as data centers, multi-branch businesses, and remote stations.

Environmental Monitoring

Monitors the changes in the environment such as temperature, humidity, water leakage, air quality. This process helps to identify and reduce potential risks.

Energy Monitoring

Monitors the energy consumption of your IT and infrastructure equipment within your facility. By tracking energy usage, we provide insights to optomize efficiency and reduce costs.

Setting Alarms

Creating an alarm for threshold values that users can set.

Management

Provides system control of scenarios created on alarms.

Reports

Creating historical environmental and energy monitoring reports.

Power and PUE Analysis

Data Center and System Rooms
- Efficient energy use (PUE) reports
- Carbon emission reports
- Energy consumption reports
- Energy cost reports
- Cooling capacity reports
- Energy trend reports
- Cooling and energy capacity reports

Map Support Security

Enabling users to access devices with role-based access control.

Billing

Invoicing over your equipment's electricity consumption.

Camera Support

High resolution camera support.

Central Monitoring

Web interface that can monitor multiple locations on one screen.

Diagrams

Setting alarms on the dynamic diagram of the location dynamic alarm and visualization feature with visuals of your facility's single-line diagrams Monitoring & Management System.
